

OUR CLASS EXCHANGE WITH SWEDEN

When I saw Sweden I goggled my eyes at the wonderful landscape.

When our teacher told us that we would do a class exchange with Sweden, first of all, I thought: Volvo, IKEA, H&M, Vikings, cold and... beautiful girls, of course.

When we landed , I saw forest all around and houses made of wood. During the journey to Nässjö I could see only forest and lakes. I hated the weather because it was too cold and humid, we could touch the fog.

Another strange thing was that Swedish people love candies; They ate them every day.

A thing that I don't like about Sweden is that there aren't any discos or pubs where young people can go after dinner, so nobody is outside at night and they can only play videogames or watch TV.

The hosting family was very friendly and funny with me and Matteo.

The best thing in Sweden, in my opinion, is the school ! I love the Swedish school!

It's relaxing, quiet and it's like American school.

I think that our school is harder and more serious but it gives us a better knowledge.

At school I met a lot of friendly and talkative people.

I liked the trips in the countryside and to Gränna where we bought a lot of coloured candies, and also Jönköping but the weather was worse.

Anyway, the trip that I enjoyed most was the one to Stockholm, a wonderful capital city.

At the end of this experience I feel richer inside.
